

## **Pumper/Hauler Registration**

Upper Salford Township passed Ordinance 2011-1, which requires every on-lot system within the township to be pumped out at a minimum regular interval of once every three years. Only pumping receipts from pumper/hauler businesses registered with the Township will be accepted to establish the residents' compliance to the pumping requirement. Pumping receipts must include the following information:

- your company name
- resident's name
- resident's address
- number of gallons pumped
- date service provided
- signature of pumper

All septic pumper/hauler businesses are invited to register with the Township in order that they may conduct business and/or perform services within the Township, as per Ordinance 2011-1. If you would like to register, kindly provide to the Township the following items along with your contact information:

- A current, valid license from the Pennsylvania Department of Environmental Protection (PA DEP)
- A list of treatment facilities to which waste is transported for treatment
- Certificate of Insurance naming Upper Salford Township as a certificate holder
