

October 26, 2026

Dear Customer,

We are contacting you about an upcoming project occurring in Lower Salford and Upper Salford townships that will enhance the local electric distribution system. This project is part of our continued investment in your community to strengthen the electric system, prevent customer outages, modernize the electric grid, and reduce the impact of extreme weather on electric infrastructure.

About the project:

- We will be upgrading and installing new, innovative equipment, including new poles and tree-resistant aerial wires.
- Advanced devices will be installed that can stop the flow of electricity if a problem occurs and automatically restore electricity where possible.

What you'll see during this project

- We anticipate that tree removals and tree trimming work will be required.
- Work will occur along Harleysville Pike; Oaklyn and Woodlyn avenues; Freeman School, Groffs Mill, Grubb, Landis, Lederach, Meetinghouse, Moyer, Old Morris, Old Skippack, Schwenksville, and Spring Mount roads.
- All work will be performed by PECO crews and qualified PECO contractors.
- We have developed a plan to minimize direct customer impact as much as possible and to complete the project in a safe and timely manner.

During the **next few weeks**, qualified PECO contractors will be in your area surveying the necessary tree work. **If there is required tree work on your property, we will contact you directly to review the plan in-person.**

Timeline

Tree work

- Is expected to begin in late December 2026.
- Is expected to be completed in late January 2027.

Electrical equipment work, including poles and wires

- Is scheduled to start once tree work is complete.
- The project is expected to be completed in late 2027.

Crews may need to temporarily interrupt electric service to safely complete some of this work. We will work with customers to ensure they are informed in advance of our activities and any planned interruptions. **To ensure you receive all outage updates, please confirm that your phone number is accurate in our system through MyAccount at peco.com/MyAccount or by calling PECO at 1-800-494-4000.**

If you have any questions, please contact Brianna Ferrell, Customer Liaison, at Brianna.Ferrell@exeloncorp.com.

Sincerely,
PECO
